STATINTL

3 May 1967

I appreciate your letter of 15 March 1967 in response to my request for recommendation of graduate students for our China Studies Summer Intern Program. We have had a good response from several Departments of Geography throughout the country. We will probably be able to fill our quota of Summer Interns and put the Program into operation as scheduled.

I regret that we shall not be able to invite the application of your son or daughter, both of whom are extremely well qualified in fields other than geography. I did take the liberty of entering their names as possible applicants for positions elsewhere in the Agency in the Summer Intern Program. I am not sure at this time of the status of interest in their possible employment.

If, at any time, you have graduate students in geography who may be interested in our Program for next summer, I would appreciate hearing about them. I thank you again for your interest in our Program and the response you gave to my request.

Sincerely yours,

/s/ James A. Brammell
